

ET082

LANDLINE TO GSM GATEWAY

GSM communicator ET082 transmits data to monitoring station through GSM/GPRS where PSTN landline is unavailable or disconnected. If PSTN landline is cut off the device can inform the user regarding PSTN status and continue data transmission. ET082 allows to register up to 5 mobile phone numbers and automatically receive alarm system messages via SMS.

FEATURES

- Transmits data from any alarm panel
- with built-in RING/TIP terminals (PSTN)
- Two-way communication
- SMS to 5 authorized users
- 3 inputs, 3 programmable outputs

APPLICATIONS

- Property security
- Alarm system remote configuration via DTMF
- Backup connection for PSTN
- PSTN status monitoring in case it is cut-off or disconnected
